A Rational Approach to
Emerging Pathogen Biosafety Considerations

April 16, 2015 • 1:00 - 2:00 PM ET
Registration Deadline: April 14, 2015

DESCRIPTION
Microbiology laboratories are facing a challenge from a growing list of emerging pathogens. The biosafety considerations regarding test performance from specimens that may contain these emerging pathogens present a serious concern to staff and management. Labs must be prepared to deal with the risk so that patient care can be provided. This program will provide a step-by-step approach that can be used to assess the risk and make sure the lab is prepared.

OBJECTIVES
At the conclusion of this program, the participant will be able to:
- Review the biosafety risk assessment process.
- List examples of risk assessments for emerging pathogens.

SPEAKER
Michael A. Pentella, PhD, D(ABMM), Director, Bureau of Laboratory Sciences, Massachusetts Department of Public Health, Jamaica Plain, MA

AUDIENCE
This intermediate-level program is appropriate for laboratory professionals working in clinical, public health, research, veterinary and academic settings.

CONTINUING EDUCATION
The American Society for Clinical Laboratory Science (ASCLS) is approved as a provider of continuing education programs in the clinical laboratory sciences by the ASCLS P.A.C.E.® Program. Participants who successfully complete the program will be awarded 1.0 contact hour. ASCLS P.A.C.E.® is accepted by the ASCP Board of Certification and all states including Florida and California as an approved provider of continuing education. ASCLS is an approved provider with CE Broker for Florida licensees and will submit attendance to CE Broker.
