Clinical Lab Opportunities for Sepsis Management
An APHL Training Webinar
November 10, 2015 • 1:00 – 2:00 PM ET
Registration Deadline: November 8, 2015

DESCRIPTION
Over the last ten years, the number of patients with sepsis has steadily increased in the United States. Treating these patients can be difficult and expensive while the prognosis is often grim with a mortality rate of 28-50%. What can the laboratory do to help?

This program will describe the diagnostic challenges posed by patients presenting with bacteremia and sepsis and laboratory methods that could improve clinical care for these patients.

OBJECTIVES
At the conclusion of the program, the participant will be able to:
- Identify the key laboratory challenges for detection of bloodstream infections.
- Describe and discuss strategies to improve the identification and treatment of bloodstream pathogens.

FACULTY
Preeti Pancholi, PhD, D(ABMM), Director, Clinical Microbiology; Professor, Clinical Pathology, The Ohio State University Wexner Medical Center, Columbus, OH

AUDIENCE
This intermediate-level program is appropriate for laboratory professionals working in clinical and academic settings.
