What’s New in the Antibiotics Arena?

An APHL Training Webinar

December 1, 2015 • 1:00 – 2:00 PM ET
Registration Deadline: November 29, 2015

DESCRIPTION
In spite of the dire warnings we have heard, new antibiotics are in the development pipeline. Novel drugs or drug combinations to counteract infections caused by multidrug-resistant Gram-negative and Gram-positive bacteria are being investigated by both small and large companies, and may provide us with new chemical classes and previously unexploited mechanisms of action.

OBJECTIVES
At the conclusion of the program, the participant will be able to:

- Describe a set of new antibacterial agents with novel mechanisms that are currently under clinical development.
- Differentiate the new agents with respect to spectrum of activity, antibacterial targets, and resistance mechanisms.

FACULTY
Karen Bush, PhD, Professor of Practice, Indiana University, Bloomington, IN

AUDIENCE
This intermediate-level program is appropriate for laboratory professionals working in clinical and academic settings.

CONTINUING EDUCATION
The Association of Public Health Laboratories (APHL) is approved as a provider of continuing education programs in the clinical laboratory sciences by the ASCLS P.A.C.E.® Program.
