cobas® CT/NG v2.0 Test
The true solution for efficiency, confidence and cost-effectiveness

**True efficiency** because the cobas CT/NG v2.0 test and the cobas 4800 system require minimal hands-on time—with no manual pipetting of specimens into secondary tubes, and primary vial loading for all specimen types—no daily decontamination with bleach and no monthly maintenance.

**True confidence** because it demonstrates higher specificity than other tests.\(^1\)\(^2\) It has dual targets for CT, NG and Internal Control—and it’s the only test with AmpErase to virtually eliminate false positive results.

**True cost-effectiveness** because it makes testing more efficient and produces consistently dependable results, thereby nearly eliminating the need for retests.
