Candida auris: An Emerging Multidrug-Resistant Yeast

MARCH 15, 2017 • 1-2PM EDT • ATLANTA, GA

Candida auris is a globally emerging yeast that is a serious public health concern. This webinar will describe

- the recent global emergence of Candida auris,
- identification procedures and antifungal susceptibilities of Candida auris, and
- proper infection control and public health surveillance for C. auris.

Shawn Lockhart, Ph.D., D (ABMM)
Director, Fungal Reference Laboratory, Mycotic Diseases Branch, NCEZID, CDC
Objectives
At the conclusion of this program, the participant will be able to:

- Describe the emergence and spread of *Candida auris*.
- Discuss the laboratory aspects of *Candida auris*, including identification, detection of carriage, and antifungal susceptibilities.
- Review proper infection control and public health surveillance for *Candida auris*.

Target Audience
This basic-level webinar is for laboratory professionals.

Access Requirements
To participate in this webinar, you will need a computer with internet access and speakers or headphones to hear the audio.

To test your system, visit https://admin.acrobat.com/common/help/en/support/meeting_test.htm.

Special Needs
Course content is closed captioned where applicable and optimized for a screen reader.

CEUs
The Centers for Disease Control and Prevention, Laboratory Training and Services Branch, is approved as a provider of continuing education programs in the clinical laboratory sciences by the ASCLS P.A.C.E.® Program.

This webinar is approved for 1.0 hour of P.A.C.E.® credit, and has been approved for 1.0 contact hours in the General (Microbiology/ Mycology/ Parasitology) category for Florida Laboratory Licensees.

Sponsored by the National Laboratory Training Network (NLTN).

The National Laboratory Training Network is a training system sponsored by the Association of Public Health Laboratories (APHL) and the Centers for Disease Control and Prevention (CDC).
