

APHL-CDC Fellowship Programs

Jump Start Your Career!

The [Association of Public Health Laboratories \(APHL\)](#) and the [US Centers for Disease Control and Prevention \(CDC\)](#) are seeking applicants who are interested in starting an exciting new career in laboratory science while working collaboratively with industry leaders and developing professional networks. These experiential laboratory fellowships provide training to post-bachelors, -masters and -doctoral scientists in preparation for impactful careers in public health laboratories.

“It has been a unique and valuable experience to be able to see both the lab side and the epidemiology response side to an outbreak investigation.”

— Abby Hoffman, MS
Antimicrobial Resistance Laboratory Fellow

**We have
four open
fellowships!**

What are public health laboratories?

Public health laboratories are highly specialized public-sector laboratories that monitor and detect a range of health threats, such as genetic disorders in newborns, infectious diseases, environmental hazards and biological terrorist agents and more.

Learn more about public health laboratories

What will my fellowship look like?

Fellowships run one to two years and have flexible summer start dates. Each fellow is trained in nine public health laboratory core competencies and works on unique program-specific projects.
