

CDC PulseNet Asia Pacific Summit

Magnifying Better Results | 21 May - 12 June 2021

Webinar Series

PulseNet International and Illumina Asia Pacific Japan hosted a 4-part webinar series in May and June to bring together over 200 scientists across the region and globe to share ideas, experience and knowledge in the application of whole genome sequencing (WGS) for foodborne pathogens and antimicrobial resistance surveillance within the region.

Highlights from the series include:

- Overviews of national and international surveillance programs utilizing WGS
- International perspectives for antimicrobial surveillance using WGS
- Implementation success stories for WGS in the PulseNet Asia Pacific region
- Discussion of best practices for data sharing
- Demonstrating bioinformatics solutions for WGS analysis
- Best practices for sequencing foodborne pathogens using standardized PulseNet protocols

PulseNet International is a network of public health laboratories in Asia Pacific, Africa, Canada, Europe, Latin America and Caribbean, the Middle East and United States dedicated to the laboratory surveillance and outbreak detection of foodborne pathogens.
