

Human and Animal Food Laboratory Framework Entry Level Program Specific – Specialized Testing

Animal Food

Definition: Basic theory and chemical testing related to animal food.

Level 2 Competency: Indicate how animal food testing safeguards human and animal health.

Level 3 Competencies:

- Describe the role of the laboratory in animal food sample testing. - Communication
- Explain how animal food test results are used. - Leadership
- Describe how regulatory requirements impact animal food testing. - Programmatic
- Perform animal food testing. - Technical

Regulatory

The laboratory analyst can explain the purpose behind these systems.

Human and Animal Food Laboratory Framework Entry Level Program Specific – Specialized Testing

Shellfish Regulatory Programs

Definition:

Laboratory testing performed in support of the National Shellfish Sanitation Program.

Level 2 Competency: Apply the requirements of a regulatory shellfish program.

Level 3 Competencies:

- - Communication – Articulate laboratory requirements to perform testing under the NSSP.
- - Leadership – Apply knowledge of laboratory testing to optimize efficiency.
- - Programmatic – Follow the requirements of the NSSP.
- - Technical – Perform laboratory testing under the NSSP.

**Human and Animal Food Laboratory Framework
Entry Level Program Specific – Specialized Testing**

NSSP	
Partnerships Cooperative programs ISSC NSSP checklist Checklist interpretation	Approved methods/applications Purpose/mission Regulatory documents Program requirements Shellfish control authorities
	Compliance New technology New methods Model ordinance Control plan
Definition: The National Shellfish Sanitation Program and the cooperative efforts that support the Program.	
Level 4 Competency: Summarize the significance of the laboratory within the NSSP.	
1. Level 5 Competency: Describe the role of the ISSC in the NSSP.	
Based on Level 5 competency – Not an all-inclusive list	
BEHAVIORAL ANCHORS Average	BEHAVIORAL ANCHORS High
The laboratory analyst ... <ul style="list-style-type: none"> • Can define ISSC • Can define NSSP • Can talk about what the ISSC does within the NSSP (cooperative relationship) • Can find the ISSC website • Understand the relationships of the agencies within the program 	The laboratory analyst ... <ul style="list-style-type: none"> • Can explain the purpose of the ISSC • Can explain how the conference works <ul style="list-style-type: none"> ○ Task forces ○ Committees ○ Assembly • Can explain the proposal process
5. Level 5 Competency: Locate the NSSP checklists in the guide for the control of molluscan shellfish.	
Based on Level 5 competency – Not an all-inclusive list	
BEHAVIORAL ANCHORS Average	BEHAVIORAL ANCHORS High

**Human and Animal Food Laboratory Framework
Entry Level Program Specific – Specialized Testing**

<ul style="list-style-type: none"> • Can find the checklists on the ISSC website • Can find the checklists in the model ordinance • Use the correct (current) version 	<ul style="list-style-type: none"> • Can point out that links do not work or are outdated or incorrect
--	---

9. Level 5 Competency: Explain the importance of the NSSP checklist.

Based on Level 5 competency – Not an all-inclusive list

BEHAVIORAL ANCHORS Average	BEHAVIORAL ANCHORS High
<ul style="list-style-type: none"> • They can relate the checklist to their day-to-day work • They recognize that there are consequences if the checklist is not used • Can read a single line item on the checklist and determine if they are compliant 	<ul style="list-style-type: none"> • Can perform an internal audit using the entire checklist • Can compare the checklist with an SOP • Can use the checklist to review and/or develop SOPs

4. Level 5 Competency: List the cooperative partners involved in the NSSP.

Based on Level 5 competency – Not an all-inclusive list

BEHAVIORAL ANCHORS Average	BEHAVIORAL ANCHORS High
<ul style="list-style-type: none"> • Know where they (as a lab person) fit within the program • Know why the program is relevant to them • Can list federal, state, private industry, tribal entities, academia 	<ul style="list-style-type: none"> • Can name individual federal partners (FDA) • Can explain the role of FDA (MOU with ISSC) • Are aware that there is an international component • Are aware of regional groups and their importance • Understand how the states administer the program

5. Level 5 Competency: Determine whether a method is approved under the NSSP.

Based on Level 5 competency – Not an all-inclusive list
