Advances in HIV and HCV Testing
Thursday, March 9, 2017 2:00–3:00 pm ET

DESCRIPTION
The National Association of State and Territorial AIDS Directors (NASTAD) and the Association of Public Health Laboratories (APHL) are presenting a webinar to discuss advances in HIV and HCV testing. HIV and HCV testing technologies continue to evolve. New and emerging technologies and strategies can help health departments to strengthen their prevention and linkage portfolios by providing tools to diagnose infections earlier, improve linkage to needed care and treatment and integrate HIV and HCV services.

SPEAKERS

Mark Pandori, PhD, Director
Alameda County Public Health Laboratory
An overview of HIV and HCV technologies, including new and emerging technologies and discussion on potential applications in public health programs.

Dr. Carolyn Wester, Medical Director, HIV, STD and Viral Hepatitis
Tennessee Department of Health
Discuss how her health department uses various testing technologies and strategies in their prevention and linkage programs, as well as future plans and challenges.

Once you have successfully pre-registered, you will receive call-in and log-in information. Please contact Alyssa Kitlas at akitlas@NASTAD.org if you need additional information or assistance.
