

Influenza Virologic Surveillance Right Size Roadmap

In July 2013, CDC and APHL released First Edition, Influenza Virologic Surveillance Right Size Roadmap. One of the primary objectives of the Right Size project is to gather feedback from the public health community over the course of the 2013-2014 influenza season. The feedback will be used to make improvements to for a 2nd edition of the Roadmap for the 2014-2015 season. We encourage you to complete the form and email it to fluquestions@aphl.org. Thank you!
